Contents Volume 39

Nos. 1 and 2

Announcement from the Publisher v

E.C.J. Claas, M.J.W. Sprenger, G.E.M. Kleter, R. van Beek, W.G.V. Quint and N. Masurel (Netherlands)
Type-specific identification of influenza viruses A, B and C by the polymerase chain reaction 1

R. Osborne, H. Mason, M. Browning, R. Mitchell and W. Jarrett (UK)
A sensitive assay for detection and measurement of neutralising antibody to human immunodeficiency virus 15

T. Wetzel, T. Candresse, G. Macquaire, M. Ravelonandro and J. Dunez (France)
A highly sensitive immunocapture polymerase chain reaction method for plum pox potyvirus detection 27

S.H.S. Lee, J.E. Boutilier, M.A. MacDonald and K.R. Forward (Canada)
Enhanced detection of respiratory viruses using the shell vial technique and monoclonal antibodies 39

R.W. Thorp, J.Y. Mortimer, A. Mahony and P.P. Mortimer (UK)
Is the IEMA combined incubator/shaker device preferable to a waterbath for incubating enzyme immunoassays? 47

K.L. Rubino and J.A. Nicholas (USA)
A novel, spectrophotometric microneutralization assay for respiratory syncytial virus 55

P. Balfe (UK)
A statistical method for the detection of false positives and false negatives in microtitre format PCR assays 69

E.W. Ades, J.C. Hierholzer, V. George, J. Black and F. Candal (USA)
Viral susceptibility of an immortalized human microvascular endothelial cell line 83

M. Welnicki and C. Hiruki (Canada)
Highly sensitive digoxigenin-labelled DNA probe for the detection of potato spindle tuber viroid 91

Å. Thörner, M.E. Johansson and J.C. Hierholzer (Sweden, USA)
Restriction endonuclease patterns of adenovirus type 12 and 18 101

A.S. Gambaryan and M.N. Matrosovich (Russia)
A solid-phase enzyme-linked assay for influenza virus receptor-binding activity 111

M.L. Ng, W.K.P. Choo and Y.L. Ho (Singapore)
Detection of flavivirus antigens in purified infected Vero cell plasma membranes 125

J. Hörling, Å. Lundkvist, J.W. Huggings and B. Niklasson (Sweden, USA)
Antibodies to Puumala virus in humans determined by neutralization test 139

H.I.J. Thomas, P. Morgan-Capner, G. Enders, S. O'Shea, D. Caldicott and J.M. Best (UK, Germany)
Persistence of specific IgM and low avidity specific IgG_1 following primary rubella 149

N. Fineschi, V. Pellegrini, A.J. Zuckerman and F. Cavalieri (Italy, UK)
Assessment of inactiviation of hepatitis A vaccine by compound PCR 157

D.L. Redmond, N.F. Inglis, T.A. Fitzgerald, D.R. Snodgrass and A.J. Herrring (UK)
A liquid-hybridization method for typing the Vp4 and Vp7 genes of bovine rotaviruses 165

C.E. Jenkins (UK)
An enzyme-linked immunosorbent assay for detection of porcine parvovirus in fetal tissues 179

G. Voss, S. Nick, C. Stahl-Hennig, K. Ritter and G. Hunsmann (Germany)
Generation of macaque B lymphoblastoid cell lines with simian Epstein-Barr-like viruses: transformation procedure, characterization of the cell lines and occurrence of simian foamy virus 185

C. Wenbin, Q. Xinyong and T. Maguire (New Zealand)
A simple and rapid method of preparing large fragments of dengue virus cDNA from replicative-form RNA using reverse transcriptase and PCR 197

M.G. Angell, N.D. Christensen and J.W. Kreider (USA)
An in vitro system for studying the initial stages of cottontail rabbit papillomavirus infection 207

M.E. Major, R.P. Eglin and A.J. Easton (UK)
3′ Terminal nucleotide sequence of human astrovirus type 1 and routine detection of astrovirus nucleic acid and antigens 217
E.C.B. Nadala, Jr. , Y. Lu, P.C. Loh and J.A. Brock (USA)
A streptavidin-biotin-enhanced nitrocellulose enzyme immunoassay for the detection of rhabdovirus of penaeid shrimps from infected animals (*Short Communication*) 227
L.E. Bockstahler, P.G. Carney, G. Bushar and J.-L. Sagripanti (USA)
Detection of Junin virus by the polymerase chain reaction (*Short Communication*) 231

No. 3

Announcement from the Publisher iii
G.R. Smith, R. Van de Velde and J.L. Dale (Australia)
PCR amplification of a specific double-stranded RNA region of Fiji disease virus from diseased sugarcane 237
M.M.M. Salimans, M.J.A.W.M. van Bussel, C.S. Brown and W.J.M. Spaan (The Netherlands)
Recombinant parvovirus B19 capsids as a new substrate for detection of B19-specific IgG and IgM antibodies by an enzyme-linked immunosorbent assay 247
A. Telenti, P. Imboden and D. Germann (Switzerland)
Competitive polymerase chain reaction using an internal standard: application to the quantitation of viral DNA 259
Y. Drastini, F.S.B. Kibenge, P.K. McKenna and A. Lopez (Canada)
Comparison of eight different procedures for harvesting avian reoviruses grown in Vero cells 269
R.J. Carrick, G.G. Schlauder, D.A. Peterson and I.K. Mushahwar (USA)
Examination of the buoyant density of hepatitis C virus by the polymerase chain reaction 279
H.M. Fouly, L.L. Domier and C.J. D'Arcy (USA)
A rapid chemiluminescent detection method for barley yellow dwarf virus 291
R. Sinclair and J.A. Mumford (UK)
Rapid detection of equine herpesvirus type-1 antigens in nasal swab specimens using an antigen capture enzyme-linked immunosorbent assay 299
M.-C. Mazeron, B. Benjelloun, C. Bertrand, J.-L. Pons and Y. Pérol (France)
Comparison of MRC-5 and continuous cell lines for detection of cytomegalovirus in centrifugation cultures 311
D.J. Morris, P.E. Klapper and G. Cleator (UK)
Detection of false seroconversions in cytomegalovirus seronegative platelet donors by serial complement fixation or IgG-specific radioimmunosorbent tests 319
